Education

Izmir University of Economics – 3rd year Computer Engineering Student | 2023-2027

Languages

- Persian: Native language
- English: **C2** Native-like fluency
- Turkish: **C1** Native-like fluency
- French: **A1** Beginner

Summary

In 2023, I graduated 3rd in my school and received a medal from Mimar Kemalettin Anadolu Lisesi's Mathematics department (despite being an international student).

Technical Skills

- **Languages:** Java, Python, C#, C, SQL, JavaScript, PHP, HTML/CSS
- **Frameworks & Libraries:** React.js, Node-RED, JavaFX, Numpy, matplotlib
- **Tools & Platforms:** WordPress, Postman, Git/GitHub, Matlab
- **Network Management & Core Competencies:** CCNA, System Architecture, Algorithms & OOP
- **Soft Skills:** Team Leadership, Agile Project Management, Effective Communication, Time Management, Class/Group Management

Experiences

Egebimtes Bilgi Teknolojileri A.Ş., Izmir

Intern – January 2026 – February 2026

During this project, I gained a deep understanding of system architecture by reviewing existing **C#** software and source codes, and expanded my technical skillset by working with various new tools and applications, including **Postman** and **Node-RED**.

Private Tutor | Freelance, Izmir

September 2025 – Present

- Continuous Learning: Reinforcing and consolidating my core computer science, mathematics, and linguistic knowledge by continuously reviewing and updating foundational concepts through teaching.
- Mentoring students to support their academic and technical growth, while heavily improving my communication, adaptive thinking, and ability to simplify complex technical topics.

British Town, Izmir

English Teacher – September 2024 – December 2025

Successfully handled classroom management and group dynamics by teaching both child and adult groups at A1-C2 levels under a fast-paced work environment in dynamic classes with up to 12 students. Prepared numerous IELTS students for their examinations.

KBsneak, Izmir

Web Developer – November 2023 - January 2024

Developed an end-to-end e-commerce website (kbsneak.com) from scratch using WordPress and HTML+JS+CSS, targeting the Persian-speaking market and listing 150 active products with an optimized user experience.

kbsneak.com

Webariom, Izmir

Web Developer – August 2023

Developed my own personal website for learning about front-end applications.

webariom.com

SUNIC, Izmir

Web Developer – May 2023 - July 2023

- Completely redesigned the company's official corporate website (sunic.com.tr) from scratch using WordPress, aligned with modern design trends and user experience (UX) principles.
- Delivered a dynamic visual interface and optimized page loading performance by implementing custom CSS and JavaScript integrations.
- Ensured the website runs seamlessly across all devices by carrying out mobile responsiveness studies.

sunic.com.tr

Freelance, Germany

Python Project – January 2022 – February 2022

- Developed a data analytics and visualization tool using Python (Pandas, Matplotlib) to process large datasets.
- Enabled the transformation of raw data into meaningful charts.

Networking, Iran

Networking Experience – August 2020

Gained a few weeks of hands-on field experience following the completion of my CCNA course.
